To my mother, Doris.

Thank you for always believing in me.

Foreword.

I have the advantage of practicing laser therapy for the past 20 years. During this time I also ran a laser distribution agency for almost 10 years and been involved in laser training for the past 16 years.

As a seasoned laser therapist with decades of experience working with almost all types of aesthetic lasers, it's fair to say a few liars, crooks, and scammers have crossed my path. I've learned to quickly separate the good actors from the bad. And I hope that with this book I manage to give you some benefit from my experiences and help you avoid some of the mistakes I have made.

This book is intended as a buffet of knowledge. Skip generously, don't suffer through anything. The entire collection of articles can be read in sequence or as stand-alone articles. That said, make a brief mental note of anything you skip. Maybe put a dot in the corner of the page. Perhaps, it's skipping and forgetting these very topics or questions that have created blind spots, bottlenecks and unresolved problems in your career.

Enjoy.
